

Beachcomber is committed to energy conservation

Our green philosophy

We take great care in the study of our product. We put people power and resources into materials and technology that we use to build our products. Below are some of our ongoing initiatives;

Enviroskirt™

Few things fit as well with our environmental commitment as our cabinet. It's a big part of a hot tub. It requires no maintenance, and lasts a lifetime.

PermaSeal Foundation™

Our specially designed bottom cap helps seal the hot tub, and completes the integrated unit. You can't see it, but it's finishing that makes it a beautiful piece of equipment.

4WALL™ Insulation

It's just the best way to build a hot tub. Just like your home, all 4 walls are insulated to ensure energy efficiency and quiet, dependable operation.

Like minded Partners

We choose supplier partners that share our values. It's an ongoing philosophy to continually adopt new ways of conserving and using energy and materials wisely.

Corporate Recycling

From recycling bins at our employee's desks, to huge cardboard bins in our production and storage yards, we are committed to active recycling in all we do.

Enviro-Friendly Materials

From the internal foam that we use, to the creosote-free lumber, we are committed on the inside of our hot tubs to use as much earth friendly materials as possible.

Equipment Efficiency

We use state of the art technology to run our equipment. From super efficient switching to low restriction plumbing kits, we invest in R & D to get it right.

Constant Innovation

We are in a constant state of product and process evolution. We are a young management team, committed to do what's right for our customers.

Reduce your environmental footprint.

By simply having your water tested, you will have better results with your hot tub and you will use your water care products more wisely. Bring in a sample of your hot tub water to your local dealership for analysis.

Founder Keith Scott believes in corporate responsibility.

Keith Scott

Founder,
Beachcomber Hot Tubs

We have always been committed to our environment, and energy conservation. And even more now, as resources become more precious. We look for ways to reduce, reuse and recycle in all of our processes, from manufacturing, to our global offices, to the way we build our product. We are proud as a Beachcomber family of employees and associates, to offer you a highly energy efficient hot tub that you can use for pennies a day, all year long. I guarantee it.

HOT TUBS

green power

Front cover: Beachcomber's Eclipse Lighting Package lights up a 750 executive hot tub.

www.beachcomberhottubs.com

Light your hot tub all year, for only...

94¢*

Beachcomber's model 750 Lighting System is an energy miser.

We are passionately committed to conservation, and energy efficiency. Take our lighting, for example – you can enjoy this complete lighting system in our fully loaded executive model 750, using it for an hour, five times a week, all year, for less than 94 cents. When we engineer our systems, we think about how we can be responsible stewards of our resources; we invest in learning how our carbon footprint can be managed, and even made smaller, for today and for the coming generations. Enjoy lighting for romance and mood, knowing that you are wisely using your resources!

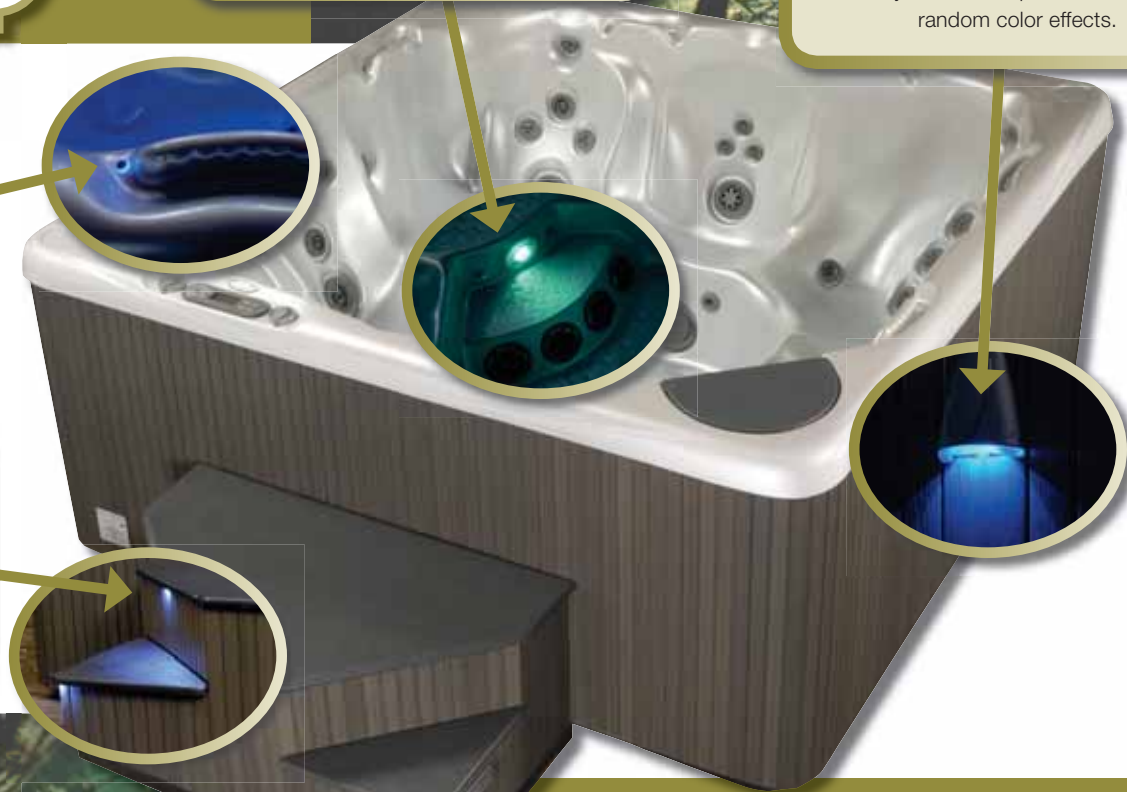

green

EverLite™ Underwater Moodlighting
At the touch of a button, water is illuminated to cast any color into the water that you wish, for the moods you feel. It's a chromatherapeutic experience that pleases at night.

Garden EverLite™
Wash your environmentally friendly EnviroSkirt cabinet with any color you desire. Fully adjustable topside lighting lets you choose specific colors, for random color effects.

Eclipse Lighting™
A revolutionary concept exclusive to Beachcomber gives you light pods inside the body molded hand grips. Fully adjustable lighting gives you all the colors of the rainbow.

Guiding Lite™
Tiny fixtures illuminate the way to your hot tub, all year long. These incredibly durable MicroStars cast constant light to ensure your safety, and to give beautiful night ambience.

Beachcomber's Environmental Stewardship Commitment

At Beachcomber, we build our business by preserving for the generations to come - it's your kids and ours that hold the keys to a better future. It's our desire to support them now by doing what's right, today.

Beachcomber is committed to:

- Providing energy efficient hot tubs, including 4WALL insulation.
- Taking eco-responsibility in each of our centers by actively recycling materials such as paper and plastic.
- Choosing like-minded suppliers and business partners who share our values and passion for our environment.
- Respecting our resources by seeking improvement in every part of our process to preserve and protect our future.

HushPump™ 24/7 energy miser

We partner with our suppliers to co-develop pumping technology for our hot tubs. We use carefully inspected components for top quality, to save space and electricity and provide the very best in massage, therapy and enjoyment. Our HushPump for example, will turn 40,000 gallons of water a day, and draws just .63 amps. That's amazing performance! Low electricity usage fits our environmental stewardship commitment perfectly, and gives you proper filtration, cleaning and heating for your hot tub.
